DESIGNERS: UNLEASH YOUR IMAGINATION WITH HumanEyes Creative3D!

HumanEyes Creative3D* revolutionizes the creation of 3D printed content: designers can now independently and easily create their own special effects projects and pass those jobs on for easy output by professional printers.

* for MAC OS X only

HOW DOES IT WORK?

2D to 3D is done in a few easy steps: HumanEyes Creative3D's tools turn the usually tedious job of tracking into a quick, fun and creative process!

CONVERT EXISTING 2D IMAGES INTO AMAZING 3D PRINTED ANIMATIONS

Separate yourself from the competition by adding depth and life to your print jobs with 3D and other special effects!

Special Effects achievable

- 3D
- Flip between 2 images
- Movement
- Zoom
- Rotation
- Morph

1 CHOOSE ANY 2D IMAGE

Open any 2D image in JPEG, TIFF or PSD format... Or take your own shot using a single standard digital camera.

2 SEPARATE THE LAYERS AND COMPLETE THE BACKGROUND

Use one of our specialized matting tools to separate your picture into several layers. Then, fill-in the holes in background using the In-Painting tool.

3 ADD LENTICULAR EFFECTS TO YOUR LAYERS

Add the effects you'd like to see in the image: 3D, animation, flip and/or zoom.

4 PRINT A PREVIEW

Print a preview of your project on a 5*7", 40 LPI lens media (HumanEyes offers a special lenses kit).

Applications are limitless: from POP to advertising media, posters, backlit signs, product packaging, plastic cards, greeting cards, and much more...

3D and special effects catch the eye and are a proven way to get - and keep - consumer attention!
